

**Yr  
Wyddfa  
(Double Exposure, Found)  
*Inspired by one and two star Trip Advisor reviews***

Tropical sea beasts erupt	awful experience
in the ancient Lapetus Ocean	not a spiritual place to be
hurled from earth's furious womb	people behind every rock
faulting folding colliding	crouched down emptying their bowels
sculpting cascading	rivers of waste
violent glaciation creating	such an ugly place
this unnamed thing	with ugly rocks
then we come	queue after queue after queue
mounting conquering	charging £70 for parking
objectifying	a somewhat underwhelming experience
450 million years or more of being	disappointed by the outcome
reduced to a mere snaw dun (snow hill) Snowdon	reflects badly on Wales
nomenclature dominion over the wilderness	two stars given due to a minor sense of achievement
yet the mountain's metamorphosis is incomplete	steps, handrail and wheelchair access needed
for ancient giants stir within	just turn around and head back down
Yr Wyddfa awakening	this mountain it's awful a terrible place to be
450 million years of wisdom	and how stupid people are it's just breathtaking
